**TEST PREPARATION**

Making the decision to attend college is probably one of the most important decisions you'll ever make, and your performance on college entrance exams is instrumental in determining your college choice. Universities and colleges throughout the U.S. require applicants to take the SAT or ACT as part of their evaluation package. These course will prepare you for both tests.

**SAT / ACT PREPARATION - VERBAL QUESTIONS**

The ACT verbal sections are called the Reading Test, the English Test, and the Science Test. The Reading Test and the English Test assess your knowledge of English usage, grammar, and reading comprehension. This course will provide you with a grammar and usage review specifically geared to the rules that you'll be tested on in the ACT. You'll also learn how to maximize your time on reading comprehension passages and the passages in the science test.

Beginning in 2005, the ACT began offering an optional essay test. If you choose to take the essay test, our course will show you how to do your best writing in the short period of time you'll be given.

In 2005, the SAT verbal questions also changed. The lessons in this course are designed to prepare you for those changes. The new verbal sections are called Writing and Critical Reading. The Critical Reading section consists of sentence completions and reading comprehension of both long and short passages. You'll learn how to answer both types of questions in the most time-efficient manner. The SAT also contains a new Writing section, which includes a student-written essay and multiple-choice questions about grammar and English usage. This course will prepare you to write the type of essays that grading officials are looking for, and will provide you with a grammar and usage review that's specific to the rules you'll be tested on in the new SAT.

In addition to preparing you for specific question types on both exams, this course will give you pointers in time management, anxiety relief, scoring, and general standardized test-taking. Weekly assignments will encourage you to work with your fellow classmates and your instructor to maximize your performance on all aspects of the verbal questions of the ACT and SAT.

**SAT / ACT PREPARATION - MATH QUESTIONS**

The ACT math tests your knowledge of arithmetic, algebra, geometry, trigonometry, and basic statistics. This course provides you with a complete math review of all these subjects. We'll also show you how to use your time wisely so that you finish as many math questions as possible in the 60 minutes the ACT gives you for the math test.

Beginning with the March 2005 exam, the SAT math questions have changed a bit. They eliminated the quantitative comparison questions and added questions on functions and graphing functions. The lessons in this course are designed to prepare you for those changes. In addition to reviewing arithmetic, algebra, geometry, and basic statistics, we'll cover functions and other algebra II subjects now tested on the SAT.

SPORTS & MARTIAL ARTS

BEGINNING AIKIDO
Adults Only
Aikido is a Japanese martial art based on the principle of non-violent self-defense. Aikido involves blending with the attack, controlling its momentum and affecting a technique (lock or throw) through centered movement. Because techniques rely on unbalancing the attacker and centered movement, often circular in nature, but not muscle strength, it is an ideal martial art for women as well as men. Besides a system of self-defense, Aikido provides many physical and mental benefits to those who practice it. Through diligent practice, it is a discipline of self-development.

Students should wear loose workout clothing, preferably with long sleeves and pant legs. Men’s and Women’s change rooms are available. Shoes will be left in a rack at the door. Students will be in bare feet on the mat.

BARTENDING THE EASY WAY
What sets this bartending course apart from others is that your instructor has developed formulas and techniques to help you learn the overwhelming amount of information bartenders must know. Using the branded method of instruction for the bar industry, The Master Code of Mixology™ is designed to be comprehensive and easy to learn. You will be a top shelf professional, as long as you put the time in to study the material that will be covered in class and online.

This class will teach you:
• techniques to help you pour liquor like a pro
• a formula for making original cocktails
• a formula for the proper portions of alcohol, so you don’t have to memorize any amounts
• sure-fire ways to increase your tips
• a technique for turning complaining customers into happy guests
• psychology to get you through the rough nights and to help you charm your customers

Though this course offers certification, keep in mind that a bartending certificate is not enough. Your training and performance are what managers consider when hiring bartenders. Bartending the Easy Way will also teach students what managers are looking for in bar staff, how to make a resume that will impress, how to ace an interview and where to find the best jobs.

All students who complete the course will be awarded a Professional Bartending Certificate. The course includes testing for “Serving Alcohol Responsibly” and those who earn scores of 90% or above on all tests will receive the Master’s Certificate of Excellence.

$50 material fee paid material fee paid at the time of registration (134-page colored manual in three-ring binder, flash cards, jigger, 2 pour spouts, practice shaker, cheat sheet, study guides, internet activities, and certificate).

Optional $10 material fee (2 practice plastic bottles).

Pharmacy Technician
10-week Program

Summary: Pharmacy Technicians work in pharmacies under the direction of a pharmacist. Their main responsibility is filling prescriptions according to doctors’ orders. Pharmacy Technicians prepare medications for dispensing to patients. This generally includes retrieving drugs in the correct dosage form and strength, measuring the appropriate amount of drug and producing a prescription label. Pharmacy Technicians work with drugs to be administered orally, topically, for the eye, nose, etc. Depending upon the practice setting, a Pharmacy Technician is also involved in the admixture of drugs for intravenous use. Other duties include:

- checking inventories and ordering supplies
- receiving and checking in supplies
- assisting customers
- keeping pharmacy work areas clean
- complete insurance forms
- preparation of “bingo cards” for nursing home patients

Course content includes: pharmacy medical terminology, the history of pharmacy, the pharmacy practice in multiple environments, pharmacy calculations and measurements, reading and interpreting prescriptions and defining drugs by generic and brand names. Through classroom lecture and hands-on labs, students will review dosage calculations, drug classifications, the “top 200 drugs”, I.V. flow rates, sterile compounding, dose conversions, aseptic technique, the handling of sterile products, total parental nutrition (TPN), dispensing of prescriptions, inventory control and billing and reimbursement.

Job Outlook: Pharmacy Technicians may work in retail pharmacies, mail order pharmacies, home infusion pharmacies, long term care facilities, hospitals, clinics, pharmacy benefit managers and large industrial complexes. The demand for Pharmacy Technicians continues to grow with demand expected to increase substantially. This high demand is the result of the constant availability of new drugs, the national shortage of registered pharmacists, the establishment of certified pharmacy technicians and the aging population. The hourly mean wage in 2015 for Pharmacy Technicians in California was $19.36.

Certification: This comprehensive 50-hour course will prepare students to enter the pharmacy field and to take the Pharmacy Technician Certification Board’s PTCB exam.

Pre-requisites: Minimum 18 years of age and high school completion or its equivalent.
