2. Hazards identification

Emergency overview: DANGER!
OXIDIZER.
HARMFUL IF INHALED OR SWALLOWED.
CAUSES RESPIRATORY TRACT, EYE AND SKIN IRRITATION.
MAY CAUSE DAMAGE TO THE FOLLOWING ORGANS: KIDNEYS,
GASTROINTESTINAL TRACT.
CONTACT WITH OTHER MATERIAL MAY CAUSE FIRE.
MAY CAUSE METHEMOGLOBINEMIA.
Toxic to aquatic organisms, may cause long-term adverse effect in the aquatic environment.

Keep away from combustible material. Do not ingest. Avoid contact with eyes, skin and clothing. Use only with adequate ventilation. Keep container tightly closed and sealed until ready for use. Wash thoroughly after handling.

Physical state: Solid. [Crystals.]

OSHA/HCS status: This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

Routes of entry: Inhalation. Ingestion.

Potential acute health effects

Inhalation: Toxic by inhalation. Irritating to respiratory system.
Ingestion: Toxic if swallowed.
Skin: Irritating to skin.
Eyes: Irritating to eyes.

Potential chronic health effects

Carcinogenicity: No known significant effects or critical hazards.
Mutagenicity: No known significant effects or critical hazards.
Teratogenicity: No known significant effects or critical hazards.
Developmental effects: No known significant effects or critical hazards.
Fertility effects: No known significant effects or critical hazards.
Target organs: May cause damage to the following organs: kidneys, gastrointestinal tract.

Medical conditions aggravated by over-exposure: Pre-existing disorders involving any target organs mentioned in this MSDS as being at risk may be aggravated by over-exposure to this product.

See toxicological information (section 11)
3. Composition/information on ingredients

4. First aid measures

Eye contact: Check for and remove any contact lenses. Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical attention immediately.

Skin contact: In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse. Get medical attention immediately.

Inhalation: Move exposed person to fresh air. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Loosen tight clothing such as a collar, tie, belt or waistband. Get medical attention immediately.

Ingestion: Wash out mouth with water. Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Get medical attention immediately.

5. Fire-fighting measures

Flammability of the product: Contact with combustible material may cause fire. This material increases the risk of fire and may aid combustion.

Extinguishing media: Use an extinguishing agent suitable for the surrounding fire.

Not suitable: None known.

Special exposure hazards: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.

Hazardous thermal decomposition products: Decomposition products may include the following materials:
- halogenated compounds
- metal oxide/oxides

Special protective equipment for fire-fighters: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

6. Accidental release measures

Personal precautions: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment (see section 8).

Environmental precautions: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods for cleaning up

Spill: Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Vacuum or sweep up material and place in a designated, labeled waste container. Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste disposal contractor. Note: see section 1 for emergency contact information and section 13 for waste disposal.

Continued on next page
7. Handling and storage

Handling: Do not get in eyes or on skin or clothing. Do not ingest. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Keep away from combustible material. Empty containers retain product residue and can be hazardous. Do not reuse container.

Storage: Store in accordance with local regulations. Store in original container, protected from direct sunlight. Separate from reducing agents and combustible materials. Keep container tightly closed and sealed until ready for use.

8. Exposure controls/personal protection

Consult local authorities for acceptable exposure limits.

Engineering measures: Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

Hygiene measures: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Personal protection:

Respiratory: Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Hands: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Recommended: nitrile rubber

Eyes: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts. Recommended: safety glasses with side-shields

Skin: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. Recommended: lab coat

Environmental exposure controls: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

9. Physical and chemical properties

Solubility: Partially soluble in the following materials: water

10. Stability and reactivity

Chemical stability: The product is stable.

Possibility of hazardous reactions: Hazardous reactions or instability may occur under certain conditions of storage or use. Conditions may include the following: contact with combustible materials. Reactions may include the following: risk of causing or intensifying fire.

Hazardous polymerization: Under normal conditions of storage and use, hazardous polymerization will not occur.

Conditions to avoid: No specific data.

Materials to avoid: Highly reactive or incompatible with the following materials: reducing materials, combustible materials and organic materials. Reactive or incompatible with the following materials: acids.

Hazardous decomposition products: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Conditions of reactivity: Explosive in the presence of the following materials or conditions: shocks and mechanical impacts and combustible materials.

Carcinogenicity: No known significant effects or critical hazards.

Mutagenicity: No known significant effects or critical hazards.

Teratogenicity: No known significant effects or critical hazards.

12. Ecological information

Environmental effects: No known significant effects or critical hazards.

Other adverse effects: No known significant effects or critical hazards.

13. Disposal considerations

The information presented only applies to the material as supplied. The identification based on characteristic(s) or listing may not apply if the material has been used or otherwise contaminated. It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste identification and disposal methods in compliance with applicable regulations. Disposal should be in accordance with applicable regional, national and local laws and regulations.

15. Regulatory information

United States

HCS Classification: Oxidizing material
                      Toxic material
                      Irritating material
                      Target organ effects

U.S. Federal regulations: United States inventory (TSCA 8b): This material is listed or exempted.
                      TSCA (Toxic Substance Control Act): This product is listed on the TSCA Inventory.
                      SARA 302/304/311/312 extremely hazardous substances: No products were found.
                      SARA 302/304 emergency planning and notification: No products were found.
                      SARA 302/304/311/312 hazardous chemicals: Potassium Chlorate
                      SARA 311/312 MSDS distribution - chemical inventory - hazard identification: Potassium Chlorate: Fire hazard, Immediate (acute) health hazard, Delayed (chronic) health hazard
                      Clean Water Act (CWA) 307: No products were found.
                      Clean Water Act (CWA) 311: No products were found.
                      Clean Air Act (CAA) 112 accidental release prevention: No products were found.
                      Clean Air Act (CAA) 112 regulated flammable substances: No products were found.
                      Clean Air Act (CAA) 112 regulated toxic substances: No products were found.

DEA List I Chemicals (Precursor Chemicals): Not listed
DEA List II Chemicals (Essential Chemicals): Not listed

Massachusetts Substances: This material is listed.
New Jersey Hazardous Substances: This material is listed.
Pennsylvania RTK Hazardous Substances: This material is listed.

Canada

WHMIS (Canada): Class C: Oxidizing material.
                      Class D-2B: Material causing other toxic effects (Toxic).

Canadian lists: CEPA Toxic substances: This material is not listed.
                      Canadian ARET: This material is not listed.
                      Canadian NPRI: This material is not listed.
                      Alberta Designated Substances: This material is not listed.
                      Ontario Designated Substances: This material is not listed.
                      Quebec Designated Substances: This material is not listed.

CEPA DSL / CEPA NDSL: This material is listed or exempted.
This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations and the MSDS contains all the information required by the Controlled Products Regulations.

EU regulations

15. Regulatory information

Hazard symbol or symbols:

Risk phrases:
- R9- Explosive when mixed with combustible material.
- R20/22- Harmful by inhalation and if swallowed.
- R51/53- Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

Safety phrases:
- S2- Keep out of the reach of children.
- S13- Keep away from food, drink and animal feeding stuffs.
- S16- Keep away from sources of ignition - No smoking.
- S27- Take off immediately all contaminated clothing.
- S61- Avoid release to the environment. Refer to special instructions/safety data sheet.

International regulations

International lists:
- Australia inventory (AICS): This material is listed or exempted.
- China inventory (IECSC): This material is listed or exempted.
- Japan inventory (ENCS): This material is listed or exempted.
- Japan inventory (ISHL): Not determined.
- Korea inventory (KECI): This material is listed or exempted.
- New Zealand Inventory of Chemicals (NZIoC): This material is listed or exempted.
- Philippines inventory (PICCS): This material is listed or exempted.
