# TEST PREPARATION

Making the decision to attend college is probably one of the most important decisions you'll ever make, and your performance on college entrance exams is instrumental in determining your college choice. Universities and colleges throughout the U.S. require applicants to take the SAT or ACT as part of their evaluation package. These course will prepare you for both tests.

## SAT / ACT PREPARATION - VERBAL QUESTIONS

SAT/ACT Preparation Part I will give you all the information you need to do well on the verbal questions of the ACT and the new SAT. The ACT verbal sections are called the Reading Test, the English Test, and the Science Test. The Reading Test and the English Test assess your knowledge of English usage, grammar, and reading comprehension. This course will provide you with a grammar and usage review specifically geared to the rules that you'll be tested on in the ACT. You'll also learn how to maximize your time on reading comprehension passages and the passages in the science test. The Reading section consists of Information & Ideas, Rhetoric, and Synthesis questions based on reading passages and quantitative information. You'll learn how to answer the question types in the most time-efficient manner. The SAT also contains a Writing and Language section, which includes multiple-choice questions about rhetoric, grammar, and English usage. The essay on the SAT is now optional and administered in its own section. This course will prepare you to write the type of essays that grading officials are looking for and will provide you with a grammar and usage review that's specific to the rules you'll be tested on in the new SAT.

In addition to preparing you for specific question types on both exams, this course will give you pointers in time management, anxiety relief, scoring, and general standardized test-taking. Weekly assignments will encourage you to work with your fellow classmates and your instructor to maximize your performance on all aspects of the verbal questions of the ACT and SAT.

Continuous Enrollment 6 weeks \$100 Online [www.ed2go.com/elac](http://www.ed2go.com/elac)

## SAT / ACT PREPARATION - MATH QUESTIONS

SAT/ACT Preparation Part 2 will give you all the information you need to do well on the math questions of the ACT and the new SAT. The ACT math tests your knowledge of arithmetic, algebra, geometry, trigonometry, and basic statistics. This course provides you with a complete math review of all these subjects. We'll also show you how to use your time wisely so that you finish as many math questions as possible in the 60 minutes the ACT gives you for the math test.

Beginning with the March 2016 exam, the SAT math questions have changed a bit. They eliminated the quantitative comparison questions and added questions on functions and graphing functions. The lessons in this course are designed to prepare you for those changes. In addition to reviewing arithmetic, algebra, geometry, trigonometry, and basic statistics, we'll cover functions and other algebra II subjects now tested on the SAT.

In addition to preparing you for specific question types on both exams, this course will give you pointers on time management, anxiety relief, scoring, and general standardized test-taking. Weekly assignments encourage you to work with your fellow classmates and your instructor to maximize your performance on all aspects of the math questions of the ACT and SAT.

# TEST PREPARATION

Making the decision to attend college is probably one of the most important decisions you'll ever make, and your performance on college entrance exams is instrumental in determining your college choice. Universities and colleges throughout the U.S. require applicants to take the SAT or ACT as part of their evaluation package. These course will prepare you for both tests.

## SAT / ACT Preparation - VERBAL QUESTIONS

SAT/ACT Preparation Part I will give you all the information you need to do well on the verbal questions of the ACT and the new SAT. The ACT verbal sections are called the Reading Test, the English Test, and the Science Test. The Reading Test and the English Test assess your knowledge of English usage, grammar, and reading comprehension. This course will provide you with a grammar and usage review specifically geared to the rules that you'll be tested on in the ACT. You'll also learn how to maximize your time on reading comprehension passages and the passages in the science test. The Reading section consists of Information & Ideas, Rhetoric, and Synthesis questions based on reading passages and quantitative information. You'll learn how to answer the question types in the most time-efficient manner. The SAT also contains a Writing and Language section, which includes multiple-choice questions about rhetoric, grammar, and English usage. The essay on the SAT is now optional and administered in its own section. This course will prepare you to write the type of essays that grading officials are looking for and will provide you with a grammar and usage review that's specific to the rules you'll be tested on in the new SAT.

In addition to preparing you for specific question types on both exams, this course will give you pointers in time management, anxiety relief, scoring, and general standardized test-taking. Weekly assignments will encourage you to work with your fellow classmates and your instructor to maximize your performance on all aspects of the verbal questions of the ACT and SAT.

Continuous Enrollment      6 weeks      \$100      Online      [www.ed2go.com/elac](http://www.ed2go.com/elac)

## SAT / ACT Preparation - MATH QUESTIONS

SAT/ACT Preparation Part 2 will give you all the information you need to do well on the math questions of the ACT and the new SAT. The ACT math tests your knowledge of arithmetic, algebra, geometry, trigonometry, and basic statistics. This course provides you with a complete math review of all these subjects. We'll also show you how to use your time wisely so that you finish as many math questions as possible in the 60 minutes the ACT gives you for the math test.

Beginning with the March 2016 exam, the SAT math questions have changed a bit. They eliminated the quantitative comparison questions and added questions on functions and graphing functions. The lessons in this course are designed to prepare you for those changes. In addition to reviewing arithmetic, algebra, geometry, trigonometry, and basic statistics, we'll cover functions and other algebra II subjects now tested on the SAT.

In addition to preparing you for specific question types on both exams, this course will give you pointers on time management, anxiety relief, scoring, and general standardized test-taking. Weekly assignments encourage you to work with your fellow classmates and your instructor to maximize your performance on all aspects of the math questions of the ACT and SAT.
