Program Description

This Certificate of Achievement is designed for working in the Commercial Music Industry, as a Music Technology expert.

The certificate is designed and managed by commercial music professionals and provides students with skill sets not typically required in traditional music curricula. Students master music technology software, including ProTools and Logic, and become Avid certified. Students develop music studio recording techniques, explore recording styles for various ensembles and different instruments, study music theory, ear-training, microphone placement, soundscapes, and develop sight-reading skills, and ensemble skills. Students enjoy the hand-on approach offered by commercial and traditional music faculty, with labs being a primary source of direct learning and collateral experience.

Career and Transfer Opportunities

This program leads to careers in music, including: musicians, music composers and arrangers, instrumentalists, music directors, and commercial music. Explore music careers on Career Coach.
