

Spring 2024

Begin your IT career with our CompTIA courses

Start with A+ Computer Technician

You're looking for greater professional opportunities and increased rewards. CompTIA A+ certification validates the foundational skills to build a satisfying IT career.

What's it all about?

The CompTIA A+ certification is the first step of your professional IT journey and can propel you toward a rewarding career in cloud computing, networking, mobility, security, or systems administration. It's the ideal foundational certification to start a career working with cutting-edge information technologies. It covers mobile, tablets, laptops, desktops and beyond. The exam verifies an individual can troubleshoot networking and security issues within operating systems such as Apple, Android, Windows, and Linux.

Why CompTIA A+? This industry-recognized certification is held by over 1,000,000 IT professionals. Moreover, it's vendor-neutral, which means the skills you develop here won't be tied to a specific company or technology; keeping your horizons in IT broad and deep.

What's in it for You?

16 Week Course/4.2 Hour Daily/Tue-Wed-Thurs 240 Hour Lab Course

90 Hands-On Computer-Lab Exercises

Students are assigned their own Computer Proficiency with Tools: Cable Splicers, Crimpers, & Network Analyzers for Troubleshooting

Hands-On Introduction to Networking & Wireless LAN's Exam Preparation via A+ Practice Exam Simulator ELAC Certificate upon Completion!

Get a Better Job by Getting an A+ Certified!

ELECTRN 121, 122, & 126

9 Units, Sections: 14549-14950, 14551-14552, 14553-14554

Tue, Wed; Thurs, 8:00 AM – 1:20

RM: E7-302 / Zoom

Spring 2024 Classes Begin Monday, February 5, 2024

CompTIA Network+

This course introduces the fundamentals of a modern computer network, such as protocols, topologies, hardware, network architecture, and network operating systems. In-depth coverage of the most important concepts in contemporary networking includes TCP/IP, Ethernet, wireless transmission, network administration, support, trouble-shooting WANs (Wide Area Networks), and security. Students develop the skills to implement the best network topology, hardware, and software for their environment, develop skills to build a network from scratch, and maintain, upgrade, and troubleshoot an existing network.

ELECTRN 125

3 Units, Sections: 14191-15192

Wednesday 1:45 PM – 7:00 PM

RM: E7-306 / Zoom
